

THE FORMULA FOR SUCCESS®

Edge 14

Research shows that feeds with high levels of cereal grains result in an exceptionally high glucose level 2-4 hours after eating. Insulin produced during starch (cereal grain) digestion may hinder proper skeletal development and integrity.

Edge Technology-based products are formulated using “superfibers” which are digested as fiber in the cecum, but have the unique ability to provide readily accessible forms of digestible energy, equivalent to 90% the value of oats. These sources are paired with vegetable oil – 2 ¼ times more energy-dense than cereal grains.

Feeding Instructions

This feed is a fully fortified ration. It is not necessary to add additional protein, vitamin or mineral supplements if this feed is fed as directed. Feed at a rate of 6-18 pounds per day depending on size, body condition or reproductive status of the horse. If feeding less than recommended feeding rate, please contact Hallway Feeds to consult about the use of Kentucky Mare Cubes or Stamm 30® to balance the diet. This feed is designed to be offered alongside forage to provide a balanced diet and should be fed with a minimum of 1.5% of bodyweight per day of high quality forage (hay, pasture, hay cubes). Always provide a clean, fresh source of water and free choice salt.

- FORMULATED FOR THE SOUND DEVELOPMENT OF THE YOUNG HORSE AS WELL AS MAINTENANCE OF THE MATURE EQUINE
- UTILIZES THE LATEST SCIENTIFIC INNOVATIONS
- NUTRIENT-DENSE CUBED FEED
- ADDED FAT

NUTRITIONAL ANALYSIS
