

THE FORMULA FOR SUCCESS®

ProEntera®

In a healthy state, the horse is host to billions of micro-bacteria that maintain the delicate balance of the digestive tract. These bacteria are a critical component for absorption of nutrients from ingested feedstuffs. **ProEntera®** assists in repopulating and regulating these intestinal microbes when certain management concerns may be present.

ProEntera is an equine specific direct fed microbial that combines live cultures of *Lactobacillus reuteri* and *Saccharomyces boulardii*. Veterinary formulated ProEntera contains 10-20 times the amount of bacteria when compared to competitive products and is the only product available that is derived from equine origin.

Beneficial For

- LOSS OF APPETITE
- ILLNESS OR ANTIBIOTIC THERAPY
- ENVIRONMENTAL STRESS
- PRE AND POST TRAVEL
- DIARRHEA OR COLITIS
- SENIOR HORSES
- DIETARY CHANGES
- POST DEWORMING
