

Dimension™ designed with the maintenance and performance horse in mind. By increasing the soluble fibers and adding fat this is an ideal choice for horses needing calories for performance while keeping a calm and cool demeanor. Dimension™ contains NO molasses or grain and is therefore the preferred feed for horses with a sensitivity to carbohydrates and sugars.

Edge Technology® based products are formulated using "super-fibers," which are digested as fiber in the cecum, but have the unique ability to provide readily accessible forms of digestible energy. These fiber sources are complimented by the addition of vegetable oil, which is 2 ¼ times more energy dense than cereal grains.

- Formulated for maintenance and performance horses
- Low starch, high fat pellet (1/8")
- NO molasses or grain products
- Protein 13%, Fat 7%, and Fiber 24%
